## BIG TRADE GROWTH

VALLEY SUPPLY COMPANY'S SALE OF ICE INCREASES 80 PER CENT

One of the oldest and most enterprising businesses in Glendale is that of the Valley Supply company, of which Harry P. Coker is the head. This company has been in business several years and has seen Glendale grow to its present proportions.

"Our company covers part of Eagle Rock, all of Glendale and Burbank as well as other parts of the valley," said Mr. Coker to a representative of the Glendale Evening News yesterday. "We employ four teams and three auto trucks in our business. Our transactions in feed and fuel are very considerable and during the past six years have ranged from \$20,000 to \$100,000 a year.

"We have fourteen employees and pay good salaries. All our people are active and competent and we try to treat them well. The consequence is that we have excellent service and our customers are generally satisfied. Our business too grows steadily, keeping pace with the growth of the population.

The Valley Supply company deals with the Union Ice company of Los Angeles and has done so for the past six years. The capacity of our storage plant has had to be increased continually. Even now with all the additions made to our storage we have not more than room enough even with the constant moving of supply to our customers. Our ice business has increased 80 per cent in three years.

"Our storage warehouse for ice is kept at an even temperature of 34 degrees Fahrenheit. As business keeps on increasing we will naturally improve our storage. During the past year or two the growth of Glendale has become very marked and as we deal with a much larger population we consider that we are serving a district of pretty nearly 10,000 people.

"Business has always improved steadily with us. Collections have not been good during the past two years or so, but they are improving also. We lose very little from bad debts. This may be due to our unique system of collecting for which many people give us full credit. Whatever may be the reason the fact is that we lose a very small percentage of our accounts. This is fortunate for us and rather a rare experience I imagine in these times. Of course we keep going after our bills and usually get them collected."

## ELKS TO VISIT FILLMORE

Arrangements have been made by the Glendale Elks for a picnic at Fillmore, Sunday, Aug. 1. The Glendale Lodge has about fifty members in Fillmore and those members have issued an invitation to their Glendale brethren and their families to attend an entertainment which they hope to make one of the most pleasant enjoyed this season. From what is known and has already been experienced of the brotherly and hospitable spirit of the good Elks of Fillmore there is every reason to believe that when they say they have a pleasant surprise in store for their visitors that there will be something very pleasant indeed.

The Glendale Elks with their wives and families will leave Tropico by special train Sunday morning at 8:30. They will be accompanied by the Glendale band and the Elks' drill team. Those intending to go on this trip are requested to hand in their names to the secretary not later than Thursday evening in order to secure accommodation. Fare for the round trip is \$1.00.

## RANCH PROPOSITION INTERESTS MANY LOCAL PEOPLE

Kenneth F. Vail, representing Claude S. Hamilton of Los Angeles, reports that much interest has been shown by local people in ranch property which he offers for sale near Fresno, Cal. The land is exceptionally fertile, has plenty of water and is priced very low, a number of excellent ranches being listed at \$200 per acre. This land is located very close to the rapidly growing city of Fresno and will steadily increase in value. Arrangements can be made any time for persons interested in ranch land to see these properties by interviewing Mr. Vail, who is located at 1105 W. Broadway, Glendale.

## BE CHARITABLE

Before we pass judgment upon another let us stop and think if we have ever been placed in circumstances as difficult as his. Not always can we know his circumstances, but often there is enough apparent upon the surface, if we would but look for it, to make us check the harsh words that rise to the tongue.

## THE CITY'S BUSINESS

### DISCUSS LIGHTS FOR COLORADO—TROPICO TRUSTEES CO-OPERATE

The regular meeting of the board of trustees of the city of Glendale was held in the city hall Monday evening, July 26, 1915. There were present: O. A. Lane, president of the board, and Trustees Chas. Grist, J. S. Thompson, A. W. Tower and George Williams. There were also present: T. W. Watson, city manager; J. C. Sherer, city clerk; W. E. Evans, city attorney; H. B. Lynch, manager of public service department; Edw. M. Lynch, city engineer, and G. B. Hoffman, city treasurer.

The minutes of the preceding meeting were read and approved. There were two communications from Miss W. F. Marr of Glendale Heights calling attention to several irregularities as to the boundaries of the assessment district in the case of the Opeechay Way and Wabasso Way street improvements. On motion Miss Marr's complaint was referred to the city attorney.

Wallace Robinson of 1312 W. Colorado street and S. P. Stanford of 545 Orange street were present and asked the board to allow them to circulate a petition for the installation of 3-globe ornamental street lights on Colorado street between Central avenue and Glendale avenue. The request of these gentlemen brought up a discussion among the members of the board as to whether it is best to install other than one-light standards outside of the business streets of Glendale. Trustee Grist advocated giving the people of Colorado street what they want and what they are willing to pay for, explaining that there is more travel on Colorado street than any other street in Glendale and he thinks a good lighting system on that street is an excellent way to advertise our city. Upon request H. B. Lynch, manager of the public service department, stated that it would cost the city \$9 per month more to furnish light from 3-globe standards than from one-globe standards on the part of Colorado street mentioned above. Trustees Lane, Thompson, Tower and Williams are of the opinion that single light standards will be very suitable for Colorado street and they think that if Colorado street adopts a three or five-light standard that other streets will do the same and that the expense to the city to furnish electricity will become burdensome. Mr. Lynch gave it as his opinion that the entire extra cost to furnish light from a three-light standard instead of a one-light standard on Colorado street from the east city limits to the west city limits would be \$500 per year. Messrs. Robinson and Stanford assured the board that it is their intention to do all they can to provide a lighting system for Colorado street that will advertise Glendale in a favorable way. Mr. Stanford stated that as many as 4000 automobiles have passed along on Colorado street in one day. It is the opinion of these gentlemen that Colorado street is deserving of the very best lighting system in use in Glendale. It was suggested by one of the trustees that after the improvement of East Broadway to the Eagle Rock road the bulk of the traffic would pass over Broadway instead of Colorado street and that being the case Colorado street would not be any more in need of three-globe lighting standards than would any ordinary street in the city. This suggestion was not concurred in by Trustee Grist and Messrs. Robinson and Stanford. The discussion came to an end by a motion referring the lighting proposition of Colorado street to the manager of the public service department and the city manager, they being instructed to ascertain the wish of the people residing on Colorado street.

Several weeks ago T. W. Preston of 725 Adams street, Glendale, appeared before the board of trustees asking that steps be taken to provide for the safety of people crossing the Southern Pacific tracks on the Los Feliz road in Tropico. At that time City Attorney Evans was requested to communicate with the trustees of Tropico on this question. The following letter received by City Attorney Evans from the city attorney of Tropico is self explanatory.

Honorable  
City Attorney, City of Glendale,  
823 H. W. Hellman Bldg.  
Los Angeles, California.

Dear Sir: On Tuesday, July 20th, the Board of Trustees of the City of Tropico instructed me to reply to your letter of July 17th addressed to the board, with reference to the condition of the railroad crossing at Los Feliz road in Tropico. Sometime ago, at the time, or shortly after the time of the deplorable accident in which Mr. Ragland

## RECORDER IS UPHELD

### APPELLATE JUDGE DISMISSES APPEAL FROM SUPERIOR COURT

Not satisfied with the decision of the superior court that Judge Whomes was amply justified in the matter of imposing four consecutive sentences on three men, one a Spaniard and the other two Mexicans, Attorney Adcock took an appeal to the appellate court. This was tried Saturday when the recorder was again sustained.

The three men were Caesar Contreras, Juan Martinez and Felipe Baritista. They had been accused of entering shops and looting small articles while their leader, Baritista, managed to absorb the attention of the store keeper.

Four separate charges were brought against the men and Judge Whomes, finding them guilty, sentenced them to four months' imprisonment in the county jail on each separate charge and decreed that each sentence should follow the other the moment of its completion. At the close of the first four months the men began time on the second sentence and so on.

Attorney Adcock brought action for writ of habeas corpus on the ground that the sentences added together mounted to sixteen months' imprisonment and that that was beyond the power of a recorder's court to impose.

Captain Helm, assistant district attorney for the people, maintained that each sentence was separate and within the power of the lower court to impose. Judge Cabanniss sustained the recorder and the appellate court now sustains Judge Cabanniss. This is the first time this unique question has come up before the superior courts from a recorder's jurisdiction.

## NEW BOOKS

Books for adults recently added to the Glendale Public Library are as follows:

**FICTION**  
Colonel Carter's Christmas.  
Contrary Mary.  
Daughter of the Dons.  
Dons of the Pueblo.  
Doodles.  
Drums of the 47th.  
Far Country.  
Idyl of Twin Fires.  
Indiscret Letter.  
Katy Gaumer.  
Primrose Ring.  
Still Jim.  
Sundown Slim.  
Thankful's Inheritance.

## NON-FICTION

Book of Entertainments.  
California Blue Book.  
Care of the Child.  
Cross in Japan.  
Dictionary of Synonyms.  
Great Within.

Just Be Glad.  
Making the Most of One's Mind.  
Mastery of Self.  
Secrets of the Hohenzollerns.  
Scientific Training of Children.  
Scottish Reminiscences.  
Tokology.  
Twentieth Century Parlor Games.  
War Brides.

## CHALLENGES ANY CAR

The King-Maxwell Agency, located at Sixth & Brand Blvd., issues a challenge to a dealer in any make of car to equal the King 8 in a demonstration. Even the highest priced and most luxurious autos are not barred. Jno. A. Pirtle, manager of the local agency, saying that if any prospective auto purchaser can find by demonstration that there is a better car manufactured than the King, he should buy that car. In other parts of the country where the King challenge has been accepted, the King has shown to advantage over cars of two and three times the King's selling price. For full particulars see large ad on page 4 of this issue.

**EVIDENCE OF BUSINESS LIFE**  
The buying public prefer to patronize the firm that shows a sensible degree of activity. The man nowadays who succeeds in business must be full of activity, he must do business in the modern way, must keep good values of merchandise, and more than that he must be able to make clear to the prospective buyer the superiority of the merchandise he is offering for sale. Printer's ink is used to explain the merits of articles of merchandise, so the intelligent advertiser has a great advantage over the man who is ignorant as to the power of the use of printer's ink. This is an age of publicity, and he who ignores the use of printer's ink in advertising his wares is not in harmony with the spirit of the present age.

(Continued on Page 3)

## BURGLARY AND FIRE

### O'BRIEN'S BASKET GROCERY BROKEN INTO AND SET ON FIRE

What might have been a very serious fire broke out in O'Brien's Basket grocery this morning about 2 o'clock. As Patrolman Hollenbeck was on duty about 2 a.m. in the neighborhood of Glendale avenue and Broadway he noticed smoke and flames issuing from the front door of O'Brien's Basket Grocery, which is situated at the northwest corner of those streets.

Immediately on the alarm being given the fire department was on the spot and in a brief time the hose was playing on the flames. Under the strenuous efforts of the firemen the flames were extinguished and it was possible to take note of the damage. Examination showed that the fire had probably originated from matches thrown on the floor by burglars.

When the fire alarm was turned in from the city hall by Officer Hollenbeck it was instantly responded to by Superintendent Lankford, who accompanied by Firemen Brewster, Potter, Eves, Fellows and Keifer, made short work of the flames. When Superintendent Keifer entered the store he found unmistakable signs of burglary. Several packages of tobacco had been taken away and others thrown about. The cash drawer had been broken into and a quantity of nickels and pennies stolen.

It appeared as though the burglars were novices at the work for they were ignorant of the fact that there was little money to be obtained and their tastes did not travel in the direction of groceries. It is also possible that they may have been disturbed in their operations by the outbreak of the fire, which was probably caused by the matches they threw on the floor.

Whatever was the reason they suddenly left on their depredations and disappeared. It was an easy matter for the criminals to break into the store as the back window has almost invariably been left unfastened and frequently wide open. It is estimated that about \$500 damage has been done to the store and its contents, which are being guarded today by Patrolman E. A. Laurence.

## ABOUT THE EASTLAND

**Editor News:** The Glendale Evening News: Your comments on the Eastland tragedy are timely, though I believe you have not probed deep enough when you throw all the blame on the inspector. When you find why 10,000 milk bottles were found to be short measure in Los Angeles and why carloads of scales in San Francisco had to be dumped in the bay on account of short weight; when you find why adulterated groceries and shoddy goods are made and why there are so many more men killed in the industries of the nation as there need be, you will find why the Slocum and Eastland and many other great disasters that brought unnecessary loss of human life occurred.

There is a great similarity between these two appalling tragedies. In both cases the owners had been sufficiently warned and knew that the vessels were unsafe; yet they could buy off the inspector and were willing to take chances of sacrificing a thousand lives for the prospective big profits. The system which compels every one to look out for himself and his own selfish interests—which makes profits the prime incentive to all undertakings; which puts the dollar above the man and profits above human life, is the underlying cause and must go if we are to make any further progress in real Christian civilization.

A few days ago four laborers on the outskirts of Pasadena picked up a few apricots that were going to waste under the trees to help out their meager noonday lunch. They were arrested and each fined \$10, and we raise money to Christianize the heathen. A church, a civilization, a society that is at peace with this merciless, unchristian, wasteful and humanistic capitalistic system cannot make any pretense of following the teachings of Jesus.

R. GILHOUSEN.

## CELEBRATED DWARFS

Early in the eighteenth century a brother and sister attracted great attention for smallness of stature. They were of Polish birth and were people of great accomplishments and elegant manners. When the brother, Count Berowaski, was one year old he measured fourteen inches in height. Five years after he had gained but three inches, but at the age of twenty the measurement was six inches more, and then the growth ceased. The sister, Anastasia, seven years younger, could stand under her brother's arm. The count lived over ninety years.

## MAKE WINNING SURE

### STRENUOUS WORK NECESSARY EACH DAY IF YOU WOULD WIN FIRST PRIZE

Following the schedule laid out for them the various players in the tennis tournament are keenly contesting the series at the Union High school summer playground. Interest in the various matches is very lively and large crowds are attending the games.

Now that the semi-finals in the senior singles have been reached it is seen that M. Freeman, Ed Sadler and Billy Balthis are in the lead. In the doubles Morse Freeman and Ed Sadler have been gaining ground steadily although their opponents have played with great skill and determination.

Joe Fishel and Russell Clark had

previously won the senior singles and were leading in the junior singles. The semi-finals in the junior singles have been reached and the series is now in progress. ## PATRONIZING LOCAL TRADESMEN

Owners of local business property might well consider the necessity that lies before every resident in Glendale to patronize the local stores. This paper has referred this duty ere now; but there is a phase of the subject that is not always considered. Quite a number of the owners of the stores in the city are resident here and yet a proportion of them make purchases in the city.

It is curious how the inconsistency of this escapes those who are guilty of such a practice. How are the business men who rent the stores to do business if many Glendale people are to make a habit of buying in the city? In case of failure of business men here how are their places to be supplied, and how are stores to be rented? It is probable that the fact that Glendale property owners frequently ignore the local stores may become known and the results to rentable property can be easily foreseen.

## STATE ROAD BUILDING

California has a comprehensive scheme for two trunk lines of state roads with a system of laterals connecting the county seats with a trunk-line system. This is resulting in the opening up of sections of country that have hitherto been beyond the reach of the ordinary traveler. The more the people see of California the more they want to see, and in order to get into the wonderful hill sections where so much mysterious beauty lies they must have roads fit for automobiles to drive on.

Just the other day one hundred editors of Southern California newspapers gathered at Pine Crest camp, on the occasion of the dedication of the "101-Mile Drive on the Rim of the World" in the San Bernardino mountains, July 17. Struck by the marvelous wealth of scenery opened up on this route, the editors adopted the following resolution:

"Resolved by the editors of the newspapers of Southern California that we favor the adoption by the state of a comprehensive and continuing plan for the building of good roads and trails in the mountains of California, through liberal annual state appropriation, and we urge upon the governor and the legislature the prompt initiation of such work."

This is an excellent resolution and is likely to bear fruit. It may be objected that quite a deal of money is being spent on roads. That is true; but not more money is being spent than is necessary and the returns from the expenditure are very great. State road management is a concrete manifestation of the universal demand of the age for efficiency and equity in the management of public affairs. The advocates of this system maintain that only by state appropriation can the burdens of constructing roads of more than neighborhood importance be equitably apportioned.

They also say that the state alone has adequate resources to handle this important work. They also demand a state highway department in order to obtain the highest engineering skill for the benefit of the whole state, and so avoid the neglect of the poorer counties. They aver that only thus can politics be eliminated from state road management. They point to the standardization of methods, costs and administration that would be promoted by centralization.

It is certain that no state has ever abandoned its management of roads once it has adopted it, and the whole tendency of modern state administration is toward a larger measure of participation by the state through increased appropriations and more comprehensive state supervision. It is therefore very likely that the editors' recommendation of a continuous state policy toward road building will carry considerable weight in state government quarters.

## RUSSIA AT THE LAST DITCH

Events of the last few days show that Russia is hardly able to hold her own against the determined onslaught of the German troops. The kaiser has thrown enormous strong forces against the czar's men and has been able slowly to press them back. This has been accomplished mainly by the superiority of the German artillery and the unlimited supply of ammunition that the Germans possess.

Russia complains that before the war began Germany had an army of spies in the land of the czar and that by the agency of these men the most important Russian ammunition works were blown up and that since then they have not been able to supply the deficiency in that important adjunct to modern warfare. There appears to be truth in the assertion; but it is too late to remedy the defect. Russia, as far as Russian Poland is concerned, is unable to check the victorious march of the Germans and will be compelled to evacuate all of Russian Poland, and will leave that country in the hands of the kaiser.

As far as the loss of Polish territory is concerned it is not likely to affect the course of the war except in so far as it will release a large number of German troops for operation against the allies in the west and of Austrian troops for action against Italy. It will prolong the war and will give Germany something on which to base demands for territory when the war ceases.

It may be expected that Russia will withdraw from Russian Poland with the greater part of her troops intact and the Germans will find that they have produced but little impression on the great Russian empire, which has enormous resources in men, if not in ammunition, and is likely to return to the fight with renewed force.

## TROPICO

Mrs. Nathan D. Burlingham arrived at her home, Rose Villa, Monday morning after a year's absence spent in Fairbanks, Alaska where she was the guest of her daughter and family, Mr. and Mrs. J. W. Neal. Mrs. Burlingham had a most delightful return voyage and her legion of friends are delighted to welcome her home. Mr. and Mrs. Neal and daughter will remain another year in Alaska before returning to California.

Several hours before the sun appeared over the eastern horizon this morning, Mrs. Louise Purnell and Mrs. C. R. Appenfelder with Mr. Thomas Morgan as an efficient pilot, started in Mrs. Purnell's automobile on a week's camping trip to the Rim of the World, Big and Little Bear Lakes. These enthusiastic autoists have the machine packed with all the necessary things for a most delightful camping trip. Both ladies are very clever with rod and reel and as fish, fine rainbow trout, are plentiful, they will no doubt secure the limit.

The Tropico school board has completed the list of teachers for the coming school year and the personnel is as follows: Robert L. Kennedy, principal; Miss Edna Brown, Mrs. Annie Curtis, Miss Emily Elias, Miss Gertrude Lofthouse, Miss Adeline Tamm, Miss M. E. Saxton, Miss Amy Bowerfield, Miss Gladys Hamilton, Miss Helen B. Furman, Miss Ruth E. Mitchell and Miss Zadia Ne-Wall.

Miss Laura Swinson of San Francisco of Cleveland, Ohio is spending a few weeks as the guest of Miss Miriam Wood of West Tenth street.

Tolly Boon and Samuel Myers who have been on a three weeks' camping and fishing trip at Little Bear Lake have returned home and are telling their numerous friends of the delightful outing they had and of their success as fishermen.

Mr. and Mrs. Harry Sawtelle of 449 Gardena avenue motored to Alamitos Bay, Sunday where they enjoyed a very delightful outing.

Miss Olivia Todd and Miss Eunice Cox of Dayton, Ohio who are spending the summer as the guests of Miss Jeanette Baldwin and sisters of N. Central avenue spent Monday at Long Beach.

Mr. and Mrs. F. S. Luther of Glendale avenue entertained Mr. and Mrs. Joseph Hohnhoft of Cincinnati, Ohio, as their guests, last week.

Mr. and Mrs. W. C. Calhoun and son, William Calhoun of Denver, Colo., who have but recently returned from two weeks' visit in San Francisco are at present the guests of Mrs. D. H. Imler and family of Palm Villa, Later, Mr. and Mrs. Calhoun and son will leave for San Diego for a few weeks' visit.

Mrs. W. E. Burke and son, Billy Burke have returned from a few days' visit at Brem where they were the guests of Mrs. Burke's niece.

Judge Morgan of San Francisco who is the guest of his sister, Mrs. Russel McBryde of 445 Gardena avenue motored with Mr. and Mrs. McBryde to San Diego Friday, where they spent several days visiting various points of interest and attending the Panama-California exposition.

Mrs. Hal H. Davenport and Mrs. Merritt W. Ludden have completed details in full for the lawn fete to be given this evening on the lawn surrounding the church. Booths are erected where articles will be on sale. A splendid cafeteria dinner will be served in the cool and delightfully pleasant parlors of the church.

Mr. and Mrs. George Lunn of Glendale avenue entertained as their guests, Monday, their cousins, Mrs. George Hardy and daughter, Miss Catherine Hardy, of New York, who reside up on the beautiful Hudson river, just above New York City. Mrs. Hardy and daughter are making a hurried though pleasant trip throughout California and visiting the two great expositions.

## CERTIFICATE BUSINESS UNDER FICTITIOUS NAME

I, the undersigned, hereby certify that I am conducting business at No. 1453 Patterson Ave., Glendale, County of Los Angeles, State of California, under the firm name of Glendale Hardwood Flooring Company, and that said firm is composed of the following named persons:

Sam Wilson, whose address is 1453 Patterson Ave., Glendale, California. Witness my hand this 13th day of July, 1915, at Glendale, California.

SAM WILSON.  
STATE OF CALIFORNIA  
ss.  
COUNTY OF LOS ANGELES

On this 13th day of July, in the year 1915, before me, Stella Smith, a notary public in and for said county, residing therein, duly commissioned and sworn, personally appeared Sam Wilson, known to me to be the person whose name is subscribed to the within instrument, and acknowledged to me that he executed the same.

Witness my hand and official seal.  
(Seal) STELLA SMITH.  
Notary Public in and for Said County and State. 279t4 Tues

## ASTROLOGY PREDICTS PEACE

The New York astrologer who hangs out on the board walk at Coney Island has been applying his mystic art to figuring out the duration of the war. Inasmuch as the calculation was made purely for his private satisfaction, and has nothing to do with his remunerative activity, it is probably entitled to such respect as astrological science merits at its best—whatever that may be. Anyhow, here is the way the Coney star wizard does it out, as given confidentially to a friend of the editor the other day.

"Peace will come during the present year, the last week in August or the first week in September."

There—the great secret is out. Use it as you like. It ought to be worth millions in speculation. If it is true, it probably means a rising market in nearly everything except war munitions and industries directly dependent on them.

If it is true, it means, too, that our troubles with Germany will soon be over. If peace is to come in a month and a half, of course the kaiser is going to stop blowing up our ships and citizens and consent to the restoration of law at sea.

The astrologer figured it out by a complex system, taking each belligerent nation in turn, and putting that nation's particular problem up to the planets for solution. "The method," he says, "is controvertible. The only possible question is as to the data on which the calculations are based. If my data are correct, peace will come as I say, but the war won't end all at once. Some parts of it may drag on, and there will be long negotiations."

"Rapheal," a noted astrologer of London, says the Coney professor predicted the war with absolute accuracy, and has made peace prediction very similar to his own. Kaiser Wilhelm was reported the other day as expecting peace in October. Maybe the kaiser is an astrologer, too.

No wonder the soldiers in Western Europe are getting sick of their job. Life in the trenches seems to have developed into a shell game.

## PERSONALS

Miss Doris W. Foote of San Diego is a visitor at the home of Mrs. John R. Barrows, 443 W. Colorado boulevard.

Dean Lockwood, nephew of Mrs. John R. Barrows, 443 W. Colorado boulevard, has gone with a detachment of the Boy Scouts to Catalina island, where a large camp of the scouts is enjoying a splendid time in the usual seaside sports.

Prof. Harold Merriam, who is head of the English department in Reed College, Portland, Ore., is a visitor at the home of Mrs. John R. Barrows, 443 W. Colorado boulevard. Prof. Merriam is on his way to San Diego, where he will visit the exposition.

City Attorney W. E. Evans and Mrs. Evans were guests at the barn dance given by Dr. N. and Mrs. Green of West Ninth street last Thursday.

Among the invited guests at the barn dance at the residence of Dr. and Mrs. Green, 120 W. Ninth St., last week, were Attorney Albert Pearce and Mrs. Pearce, 1559 Milford street.

Miss Bertha Proctor of Long Beach is a house guest at the home of Mrs. Dr. Colin Cable, 755 Columbus avenue.

Mrs. Dr. Colin Cable, 755 Columbus avenue, was the guest yesterday of Mrs. A. E. Teague of Los Angeles, at her summer home at Alamitos bay.

Mrs. M. C. McGrath with her daughters, Bessie and Althea, is a guest at the home of the Misses Provoit, 608 N. Central avenue.

Miss Annie L. McIntyre, principal of Central Avenue school, has gone to San Francisco for a month. She will visit the exposition and will attend the National Educational Association's convention, which takes place about the middle of August.

Dr. Nathaniel Green and Mrs. Green, 120 E. Ninth street, gave a barn dance last Thursday in honor of the large party of eastern guests who are a house party with Mrs. Perce Curtis, 1420 Oak street. The large upper room of the barn was beautifully decorated with eucalyptus foliage and with flowers and brilliant with numerous electric lights. The party danced to the strains of a large phonograph. A splendid luncheon was served and the evening was passed delightfully with dancing, games and other forms of amusement.

## NORTH GLENDALE

Mrs. J. E. Eckles and daughter, Miss Mabel, with Miss Agnes Scott of San Fernando road spent Monday in Los Angeles.

Mrs. Walter Parsonage of 829 Lincoln Place, with her house guest, Miss Florence Markham of National City, San Diego, were guests of Mrs. W. Hill of Arvia street, Los Angeles, at a prettily appointed luncheon party Monday.

Mrs. J. E. Barrett of 1445 Valley View road entertained as her guests for the day last Sunday the Misses Carrie and Nellie Lindsley of Chicago, who are touring California and who are at present staying in Long Beach.

Mr. and Mrs. L. C. Leeds of 900 Dryden street entertained as their guests for the week end Mr. and Mrs. Clarence Reese and small son William of South Gates street, Los Angeles.

Mrs. E. E. Mansfield of 7319 Roseberry avenue, Florence, is spending the week with her brother and family, Mr. Oliver E. Wright of 1649 Ruth street.

Mr. H. Higgins of Westlake avenue, Los Angeles, motored to North Glendale Sunday and was the dinner guest of Mr. and Mrs. Walter Parsonage of 829 Lincoln Place.

Mr. and Mrs. A. M. Hunt of 1201 Viola avenue entertained at a prettily appointed dinner last Saturday evening, their guests including Mr. and Mrs. George Ryan of Los Angeles.

Miss Loie Hunt of 1201 Vine avenue left Monday evening for Salt Lake City, where she will enjoy an extended visit with her uncle and aunt, Mr. and Mrs. A. B. Cudbeck. En route Miss Hunt will stop at San Francisco to view the exposition and other points of interest.

## WORST WEED IN WORLD

The California Blue Bulletin, just out, contains picture and description of the Russian Thistle, one of the most dangerous weeds known to the world.

This was introduced into California along the trans-continental railroad lines, probably from the bedding and the clothes of the freshly imported European laborers. It now has a firm hold in many places and it is particularly ominous to the hay and grain growing parts of the state. Warnings have been sent out by Dr. Cook, the horticultural commissioner. It is very important for the children of California to be able to recognize the weed and so get their minds turned toward its eradication. The teachers can do a useful work by using and emphasizing the important lesson thus placed in their hands.

## THE CITY'S BUSINESS

(Continued from Page 1)

was killed at this crossing, the Tropicana Board of Trustees took up the matter of a signal with Mr. Whalen, superintendent of the Southern Pacific company, with the result that Mr. Whalen and his engineer, Mr. Mercier, attended a meeting of the board and agreed to substitute the present wig-wag signal with advance lights, for the old locomotive type bell then at the crossing, the understanding being that this was to be put in approval, so to speak, and at a later date, if the Board of Trustees did not deem this signal sufficient, Mr. Whalen stated that the company would install a watchman and gates.

The Board of Trustees, at the present time, is satisfied with the signal system, except for the fact that the bell and signal continue to operate when a car or train is standing on the siding or within a certain distance of the crossing. This condition is certainly not satisfactory, and I have written a letter to Mr. Whalen, calling his attention to this condition, and Trustee Henry has also taken the matter up with one of the officials of the railroad company with whom he is personally acquainted.

I am informed that the railroad company will not countenance the allowing of cars to stand on the "block" and will summarily dismiss an employee allowing that condition to exist.

I believe that hereafter this condition will be remedied and if the same is not, or if in the future this type of signal does not prove satisfactory, we shall be pleased to take the matter up again with the railroad company to the end that proper protection will be afforded the traveling public.

The Board desired me to express to you their appreciation of the condition and to assure you that the same will be remedied.

Very truly yours,  
HENRY P. GOODWIN,  
City Attorney, City of Tropicana.

The above communication was received and ordered placed on file and the clerk was instructed to mail a copy of the same to the Glendale Chamber of Commerce, which body had advised its secretary to communicate with the board of trustees informing them that the Chamber of Commerce stands ready to assist in bringing about a speedy solution to Mr. Preston's request. The communication referred to had been previously read and placed on file.

The manager of the public service department explained to the board that hydrants should be placed on the east side of Brand boulevard between Third and Broadway and the east side of Brand between Broadway and Fifth and on the south side of Broadway in the alley west of Brand, and he stated that the installation of these hydrants will necessitate the cutting into the cement and asphaltum street, which fact he greatly regrets, but as the hydrants at these places are an absolute necessity he cannot see how it can be avoided. On motion the manager of the public service department was instructed to proceed with the installation of the hydrants at the places named.

A resolution was read adopting the census report of the four enumerators as the official census of the city and on motion the same was ordered filed with the board of supervisors to comply with the law and the city attorney was instructed to report at the next meeting concerning the necessary steps to be taken for the calling of an election as requested by the petitioners several months ago who have asked that the citizens of Glendale be given an opportunity to vote on the question of changing from a Sixth class to a fifth class city government.

An ordinance establishing grade on Bona Way and other streets in Glendale Heights was taken up for first and second reading and was laid over until next week for third and final reading.

A resolution was passed ordering the installation of five-light standards from First street to the north limit of Glendale on Brand.

On motion the demands were allowed and warrants ordered drawn on the treasury for the various amounts.

## HOW TO PAY RESPECT TO THE AMERICAN FLAG

When and how the national flag should be displayed at full staff is set forth plainly in a circular issued by the Sons of the American Revolution. These are the dates and the directions:

Lincoln's birthday, Feb. 12.  
Washington's birthday, Feb. 22.  
Battle of Lexington, April 19.  
Memorial day, May 30. On Memorial day the flag should fly at half staff from sunrise to noon, and full staff from noon to sunset.

Flag day, June 14.  
Battle of Bunker Hill, June 17.  
Independence day, July 4.  
Battle of Saratoga, Oct. 17.

Surrender of Yorktown, Oct. 19.  
Evacuation day, Nov. 25.

The flag should not be hoisted before sunrise nor be allowed to remain up after sunset.

At retreat, sunset, civilian spectators should stand at attention and uncover during the playing of the Star Spangled Banner. Military spectators are required by regulation to stand at attention and give the military salute. During the playing of the hymn at retreat the flag should be lowered, but not then allowed to

## TALKS TO FARMERS

### How much interest do you net upon the valuation of your land?

After deducting all working expenses, your time and labor, how much do you net per acre per year? 1 per cent, 5 per cent or 10 per cent? What is the value of your land, \$500, \$750 or \$1000 per acre? How much do you pay for your water, and how much water do you get for what you pay?

If you could buy land much closer in to a much bigger, faster growing city than where you are living at the present time, with better transportation facilities, better stores, amusement and education, as good or better climate than where you are now, and know that that land would net you conservatively 25 per cent per year, where you could grow all the things you are growing at the present time of a superior quality and with better organized markets to buy your produce at higher prices and you could get all the water that you want delivered to your land by ditch at a flat rate of \$1.00 per acre per year, and you could buy that land in California at \$200 per acre, practically on your own terms, you would be interested, would you not?

This is exactly and truthfully what I have got to offer if you are interested in farming, you owe it to yourself and your family to invest where they can be the most happy and contented and you can make the largest possible profit from the smallest investment. I have a little booklet dealing on this land, "FUNDAMENTAL FARMING FACTS," that will be of vital interest to you and may mean your whole future success. Call in or write and I will be glad to give you one. This is your opportunity to make a success, will you grasp it?

## COMPULSORY EDUCATION LAW

Senate bill No. 735 amends section 4 of the compulsory education act so as to provide for "an attendance officer and assistant attendance officers" instead of "attendance officers" as at present. Under the act as amended, all attendance work will be directed by one man instead of being handled by several attendance officers acting independently. The proposed bill also provides that a district, in order to be entitled to an attendance officer, must have at least 300 children in average daily attendance. At present the law requires 600 census children. The school census was discontinued several years ago, so this change is made to make the law conform with the present method of counting children in average daily attendance. The bill also provides that not more than one attendance officer shall be appointed for every 7,500 pupils in average daily attendance. The present law provides that not more than one attendance officer shall be appointed in any city or city and county for every 20,000 school census children. The change has been made to bring the law in harmony with the present method of keeping school records.

The law provides that the appointing authority may also appoint and remove at pleasure one or more deputy attendance officers to serve without compensation. This will enable school boards to deputize probation officers and school principals. Provision is made that the board of supervisors may appoint school attendance officers to serve in districts which are not provided with paid school attendance officers. These attendance officers shall be appointed only on recommendation of the county superintendent of schools. Not more than one attendance officer shall be appointed for each 7,500 pupils in average daily attendance in the portion of the county in which such officers shall be appointed to serve.

## MORE THAN A MILE DEEP

The deepest well in the world is in Upper Silesia, in the German Empire. It is a diamond-drill hole in a coal field and is 7,350 feet deep. A well in the United States which may go deeper, according to the United States geological survey, is 4 miles northwest of McDonald, Pa., and about 15 miles west of Pittsburgh. This well, which is being sunk to the Medina sandstone—a bed that elsewhere contains oil and gas—is now 7,174 feet deep. Some gas and oil were struck in the upper part of the well. Between the depths of 6,830 and 7,100 feet rocks bearing rock salt and salt water were encountered. These are regarded as of Salina age, the same as those carrying rock salt in western New York. The temperature in this well at the depth of 6,775 feet, as recently determined with great accuracy, is 145.8 degrees Fahrenheit.

At Derrick City, McKean county, Pa., near Bradford, there is a well 5,820 feet deep, which is probably the second deepest well in the United States. Another deep well is on Slaughter Creek, Kanawha county, W. Va.; it is 5,595 feet deep. It penetrated a sandstone at 5,030 to

5,050 feet, and from this depth to the bottom, a distance of 545 feet, the well is in limestone. Near West Elizabeth, Pa., there is another well 5,575 feet beneath the surface, penetrating into a black shale. Another deep well is being drilled at Gaines, Pa. This has already reached a depth of 5,500 feet. Deep well drillers in this country of course employ the most improved and effective rigs, but one of the most remarkable wells, reaching a depth of 3,600 feet, was drilled for petroleum in western China by means of such crude appliances as a cable made of twisted strands of rattan.

## MODERN MILITARY CARS

SAN DIEGO, July 27.—Great enthusiasm was aroused among San Diego exposition visitors by the exhibition of a caravan of eight armored automobiles which finished there a transcontinental demonstration run from the Northwestern Military and Naval academy at Geneva Lake, Wis., July 22.

The automobile war train is under command of Col. R. P. Davidson, head of the academy, and many of the unique features of the equipment are of his own design. Twenty-nine cadets manned the train and made the strenuous trip over plain, desert and mountain, through mud and sand without mishap either to cars or cadets. Colonel Davidson will make report on the tour to the war department, it being the first of the kind attempted in this country.

Perhaps the greatest attention was paid to the full-armed car with its rapid fire rifles. The special service cars, however, interested military officers at the exposition the more. The officers' reconnaissance car, for instance, with its altitude indicator, range and elevation finders, periscope, special Rose military rifles and map tables and instruments attracted particular attention from officers.

A hospital car carries surgeon's instruments, operating table, X-ray machine and other equipment. Another car provides a complete field kitchen in which the cooking is in fireless cookers, the initial heat being supplied by electricity. Another carries a specially constructed balloon destroying rifle, another a compact windlass and cable for demonstration of how to get a car out of a ditch or up an embankment. This might be highly necessary in actual service. A wireless car carries a mast on the running board and electric generator of 110 volts' capacity, powerful searchlight and a heliograph shutter.

Present prices of Swiss cheese indicate that the consumer pays for the holes.

Political parties should be made the servants of the people, not their masters.

Most of us would be less miserable if we were less selfish.

Its high ideals are worth more to California than its mines, its orchards and its factories.

Our neutrality toward the nations engaged in the great war should be genuine and absolute.

## THINKING IN MONEY

One of the ablest students in finance of the United States has said that "thinking in hundreds of millions" first became habitual in the United States in 1901. He adds, "We are beginning to learn now to think in thousands of millions." What he has in view more especially is the mounting indebtedness of some of the nations now at war; but he might have included the export business of his own country had he known what the treasury figures for the fiscal year closing June 30 would show. Mr. Noyes' analysis of the outlook, he said, is that experience hitherto has always shown that, let national liabilities mount as they may in time of strife, predictions of economic ruin never come true. The previously hidden but procurable capital comes forth when a supreme sense of duty calls for it.

Boader—I found something in my bedroom last night, madam, and—

Landlady (indignantly)—There's no such thing in the house! You must have brought it in with you!

Boader—Ah, perhaps I did—it was a sovereign.—London Mercury.

"I engaged the rooms for my holiday," he said, "because the landlady wrote me that they overlooked a superb garden of 200 acres, richly adorned with statuary, where I was at liberty to promenade."

"Well?" Jones inquired.

"It was a cemetery," he said bitterly.

"You're not hurrying to work this morning?"

"I'm not that."

"Suppose a duke like you don't mind losing an 'our'."

"Look 'ere, Bill, our timekeeper's daughter was married yesterday and I tell you if 'es theer to time his mornin' 'e's no father's 'eart."—Id-Bits.

The Imperial valley is quaking to the tread of its busy builders and oil takers. That region is not only rehabilitating itself, but it is pressing forward in agricultural and commercial development.

There is one law of gravitation we see very actively at work at this season—the law of appetite that causes youngsters to gravitate toward the ice-cream parlor and soda fountain.

In his prayer little Johnnie is not asking that the school vacation end. He is having the time of his life and will be in fine shape for study when the schools reopen.

Let us prepare to defend the United States both against a possible foreign foe and against extreme militarism.

If the United States should have serious trouble with any other nation, the trouble will be of that other nation's making.

There formerly was a thoroughfare in New York known as Wall street. Presumably, it is there still. It we seldom hear about it.

In 1846-7 a million persons died of famine in Ireland.

"THE CAR WITH NO REGRETS"  
KING EIGHT TRUTHS

The KING EIGHT will duplicate any stunt that any automobile—at any price—will perform and the KING EIGHT sells for ONLY \$1475.

Take hills for example—and you find lots of them when touring.

How slowly can the best automobile you know start in at the bottom of Olive St., Burbank, or the 20 per cent grade in Eagle Rock with its control in high—and how FAST can that Best Automobile you have in mind be DOING AT THE TOP of the hill?

The KING EIGHT will duplicate the stunt—and maybe go them ONE BETTER

Or, for example, let's take Hollywood Mountain from Griffith Park to Western avenue.

The KING EIGHT CAN TAKE it so easily that it makes the owners of luxury priced cars sit up and THINK.

If you can find any car that can show more mettle on trying hills—BUY the other car.

Travel down town in the crowded shopping district. WATCH the drivers of motor cars. WATCH KING EIGHT owners. NOTE who shifts gears.

When you are on a pleasure trip and want to pass the OTHER FELLOW—the KING EIGHT "picks up" from a creeping MILE and a fraction to a racing FIFTY without gear changing. That is our claim.

SILENT and velvet running. Practically without vibration.

POWERFUL—a leveler of HILLS and a camel on SAND.

Fifteen to twenty miles to a gallon. Economical on oil, tires and repairs.

America's original CANTILEVER SPRING car. Perfect riding comfort without shock absorbers. Car HOLDS to the road, however rough.

The KING is NOT a one year car. The KING is a family car—manufactured for dependability.

The KING EIGHT has all of the qualifications of the OTHER FELLOW'S car and many more, and sells for only \$1475. The KING EIGHT is NOT tagged as a 1915 or a 1916 or with any other year. It is a product built to sell on its merits, not on sales stimulant changes.

**A city man's car in beauty, silence and flexibility.**  
**The farmer's car in power, strength and dependability.**

Bore 2 1/8-inch, stroke 5-inch, wheelbase 113 inches (equal to 120 inches in a six).

Electric lights. Electric starter. The most get-at-able Eight on the market.

Make your demonstration appointments.

Agent for Veedal—The Oil Without Carbon

## WILL START PEARL FARM

Encouraged by the success of Mississippi river clam farmers in raising pearls in fresh water clams, Yee Lik, a Chinese, is about to make an experiment with salt water clams in the lagoons of Playa del Rey. He says that in his native land the artificial development of pearls in oysters has been carried on with more or less success for centuries. Some years ago an American traveler applied the same proposition to fresh water clams with a considerable degree of success and produced pearls of high quality and various colors.

Lik says the operation is simple. The clam is wounded and a small bird shot is inserted in the wound. The pearl is manufactured by nature in its attempt to counteract the baneful effects of the foreign substance. This is done by surrounding the shot with a secretion which in time becomes thoroughly hardened and perfect pearl. The color of the gem is regulated by the coloring matter embedded in the wound with the shot.

The common sense and clean tastes of the American people will not countenance disgusting, prurient sensationalism in newspapers.

Something is being harvested somewhere in California, each and every month in the year. This is a land of perpetual harvests.

Women will get the franchise throughout the United States ere long because they are entitled to it and because they can and will vote intelligently and for the welfare and advancement of the country.

Women are voting with intelligence and conscience, in equal suffrage states, as was expected.
